USDA SURVEYING CATTLE OPERATIONS

LAKEWOOD, Colo. – June 4, 2020 – In July, the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) will survey approximately 1,900 cattle operations across the Mountain Regional states of Arizona, Colorado, Montana, New Mexico, Utah and Wyoming, to provide an up-to-date measure of the United States cattle inventory.

"This information helps producers make timely, informed business decisions and plan for herd expansion or reduction. It also helps measure the pulse of the industry," said Bill Meyer, Director, Mountain Regional Field Office. "Obtaining the current count of cattle will serve as an important decision-making tool for the entire agriculture industry."

During the first two weeks of July, Mountain Regional producers will have the opportunity to report their beef and dairy cattle inventories, calf crop, death loss and cattle on feed information. To make it as easy as possible for producers to participate in the survey, NASS offers the option of responding via the internet, mail or a personal interview via telephone with a NASS representative.

As with all NASS surveys, the results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified. NASS will compile, analyze, and publish survey results in the July *Cattle* report on July 24, 2020.

These and all NASS reports are available online at www.nass.usda.gov/Publications. For more information, call the NASS Mountain Regional Field Office at (800) 392-3202.

For state specific questions please contact:
